MATRIX SIM SWITCHBOX – THE EASY WAY OF SIM SWITCHING

QUALIGON's Matrix SIM SwitchBox (MSSB) features intelligent technologies to control and switch up to 32 SIM cards and additionally up to four modems or handsets via USB.

Select between the two versions available according to your needs:

- >> MSSB 8x4 allows to multiplex 8 SIMs to 4 devices
- >> MSSB 32x1 allows to multiplex 32 SIMs to 1 device

Powered by a microprocessor, MSSB deploys real SIMs without any SIM virtualisation. Both versions can be used universally in standalone scenarios, are fully drive-test capable and represent a cost-efficient solution in many areas where SIM switching is required.

Gain your benefits by using MSSB in one of the following scenarios:

- >> Realisation of "always-on" functionality with redundant access to mobile networks
- >> Optimisation of your data connectivity by switching between mobile networks
- >> Assurance of machine-to-machine (M2M) communication via network selection
- >> Testing of the interworking between SIMs and mobile devices
- >> Testing of SIM profiles for different network technologies
- >> Automated device testing and app testing with the MobileCloud™ test system from Perfecto Mobile

TEST SYSTEMS

Key Features

- >> Combined "multiple SIM, multiple terminal" multiplexer
- >> Software controlled switching of up to 32 SIM cards and up to 4 devices
- >> Easy access to SIM cards
- >> Enhanced support for smartphones and USB devices
- >> Easy integration in existing systems
- >> Supported operating systems Windows 10, 8.x, 7, XP, Linux, Mac OS X
- >> Full control via USB
- >> Customised housing according to user requirements
- >> Fully customised switching logic
- >> Customised software controlled network access and login procedures based on your requirements
- >> Sophisticated software control interfaces via DLL, JAVA, C/C++ and HTTP
- >> Ready for integration in the MobileCloud™ by Perfecto Mobile

MSSB Admin

- >> MSSB Admin offers host based control of the MSSB
- >> Software interface provides external control of all MSSB functionalities and key features
- >> User friendly and cost-efficient integration in existing systems

Do you want to include MSSB Admin in your architecture? Our team is ready to support you. Please contact us.

Company Profile

QUALIGON
EXPRESS QUALITY

QUALIGON focuses on quality issues from the user's perspective in telecommunications.

Our services and products cover:

- >> End to End Quality
- >> Service and operator benchmarking
- >> Reporting and analysis in telecommunications
- >> Process and Quality Management
- >> Test automation with MobileCloud™ by Perfecto Mobile
- >> Full service provider for indoor localisation solutions with awiloc® by Fraunhofer

QUALIGON is a certified partner of Perfecto Mobile. We are experienced in delivering training, professional services and hosting private and public MobileClouds™.

QUALIGON is member of the awiloc® Alliance.

For more information on QUALIGON's professional services, products and portfolio **please contact us**.
