

## SOLUTIONS ON PERFECTO MOBILE

### YOUR ONE-STOP SHOP FOR PROFESSIONAL SERVICES ON THE CQ LAB

Ease the pain and limitations of mobile manual testing and ensure a flawless user experience verifying the functionality and interoperability of your mobile app under complex, real-world scenarios. Testing platforms for mobiles offer a cost-effective and reliable alternative to test devices, services and applications on real handsets either in the cloud or in your dedicated, private environments. With our background in Quality of Service, Quality of Experience and our expertise and experience in testing we support you during the complete life cycle of your applications. This comprises automation and testing of handsets, services and applications on Perfecto Mobile's Continuous Quality Lab (CQ Lab).

We enable customers around the world to benefit of the powerful automation solutions. As a full-service provider at highest certified partner level we are involved in the daily business of monitoring and the reporting for major global players. On top, we are operating numerous CQ Labs in Germany, serving worldwide customers.

QUALIGON's professional services include the definition, development, implementation and deployment of the required test cases. We offer trainings up to the reporting of results for C-level stakeholders as well as turn-key ready platforms. Our worldwide customers belong to financial sector, assurances, banks, network operators and different branches of industry.

# SOLUTIONS ON PERFECTO MOBILE

## Our Contributions to Your Success

In order to boost your business in automation with CQ Lab and to assess the required Key Performance Indicators (KPIs) we offer a variety of services to satisfy your needs:

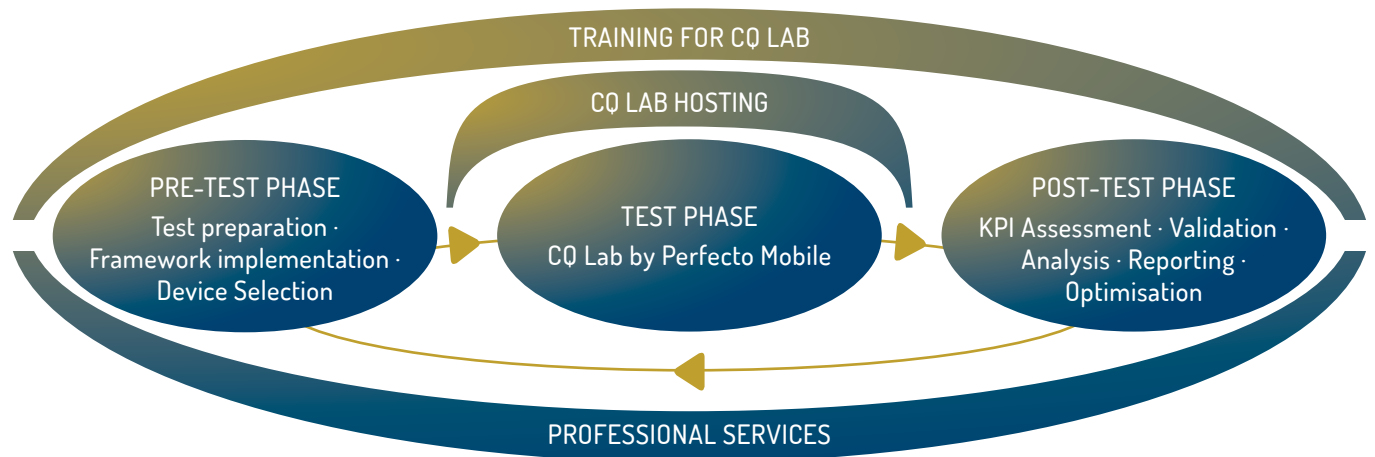

- >> Hosting of CQ Labs for public and private usage
- >> Trainings for automation on the CQ Lab in combination with the Continuous Integration approach e.g. Selenium, Appium, RemoteWebDriver, Jenkins, TeamCity and MS Team Foundation Server
- >> Automated turn-key test procedures as well as framework implementations

## Realistic Testing with Wind Tunnel

Wind Tunnel allows you to test your mobile apps under freely definable environmental profiles - including location, device(s), network coverage, and other apps running in the back ground.

## Perfecto's All-In-One Digital Quality Lab

The Continuous Quality Lab (CQ Lab) is a cloud-based mobile app and responsive website testing platform made up of solutions that enhance how you build, test, optimize and monitor mobile app usability and performance.

## Company Profile

QUALIGON
