INDOOR SERVICE TESTING ON SMARTPHONES

Are you interested in Quality of Service evaluations of 2G to 4G, including LTE, CDMA, WiFi or WiMax mobile services and networks? Do you have the need to cover outdoor and indoor scenarios? Why don't you use QUALIGON's next generations Test Suite QTS for Android® mobiles running OS 4.x and higher? QUALIGON's multiple service tester family QTS offers easy access to service and network Key Performance Indicators (KPI) needed to describe the network's quality of service and performance as perceived by the user. QTS benefits of highly integrated Android® mobiles with multiple bearer access,

always-on functionality and advanced location awareness to test services like voice, data, social networking, streaming, messaging, maps and many more.

QTS consists of location aware QTS Clients, a web-based administration to monitor and control the clients and a reporting portal for the data aggregation, visualisation and analysis of the generated results. QTS is your tool for full service test and optimisation campaigns, no matter if indoor or outdoor.

Service Tests

Data, Voice, Social Networking, Maps, Multi-Service Testing, Streaming, Messaging

Indoor / Outdoor

Integrated precise location information for indoor and outdoor environments

Web-Administration

Web-based administration of all measurement clients with advanced object orientated testcase definitions

BusinessObjects™ Reporting

Integrated SAP BusinessObjects™ portal for reporting and analysis

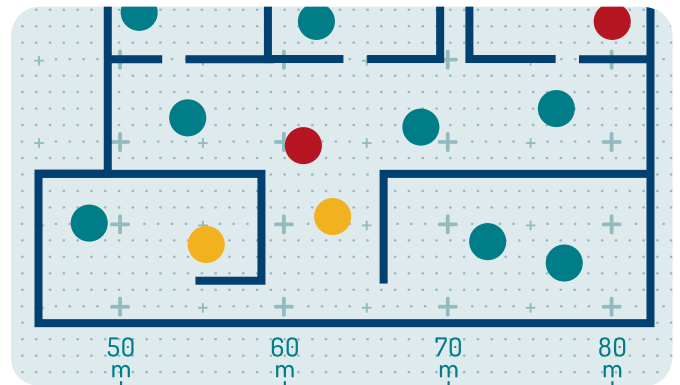

TEST SYSTEMS

Key Features

- >> Performance tests of 2G to 4G, including LTE, CDMA, WiFi and WiMax networks
- >> Runs on smartphones with Android® OS 4.x and higher
- >> Full service test and optimisation campaigns
- >> Multiple services supported, e.g. data, voice, streaming, messaging, maps, social networks and Multi-RAB/ Multi-service scenarios like RCSe
- >> Full support of stationary, walk and drive tests
- >> Full over the air administration, including scheduling and arbitration of allocated tasks
- >> Visualisation and data drilling of the assessed data in the built-in QTS Reporting Portal

Indoor Benchmarking

Use QTS for indoor tests to assess, analyse and report service and network Key Performance Indicators (KPIs) as you know it from your outdoor experience with GPS.

QTS Admin - Your Remote Control for Campaigns with functionalities like:

Administration

- >> Mobiles, SIM cards Users and Groups
- >> Test Campaigns
- >> Tasks and Services under Test

Campaign Control

- >> Control of test devices
- >> Advanced Task selection and allocation

Monitoring

- >> Online status of test activities
- >> Controlling of test campaigns
- >> Data visualisation in maps

Company Profile

QUALIGON
EXPRESS QUALITY

QUALIGON focuses on quality issues from the user's perspective in telecommunications.

Our services and products cover:

- >> End to End Quality
- >> Service and operator benchmarking
- >> Reporting and analysis in telecommunications
- >> Process and Quality Management
